

ECLIPSE MIRRORS

Hand made from jet black mirrored glass, our new collection of black convex mirrors add glamour and a glittering reflective depth to an interior.

THE ECLIPSE

Convex Mirror is framed by a narrow gold band, and is suspended on two lengths of hand made heavy gold chain. The Eclipse is also supplied without the chain, with a direct fixing to the wall.

We make the Eclipse in bespoke sizes, with the diameter ranging from 50cm up to 170cm.

Dimensions Bespoke from 15cm to 170cm
Materials Hand silvered black convex glass, Brass
Made in Britain
Designer Martin Huxford

THE MOON & ECLIPSE

The Moon, a small glittering black convex mirror orbits the dramatically larger Eclipse mirror, each one framed by a thin gold band. The smaller dark Moon is secured to the Eclipse by a hand made heavy gold chain.

We make the Moon & Eclipse Black Convex Mirror in bespoke sizes. The photograph shows a Moon of 15cm diameter and an Eclipse of 50cm diameter.

We also offer a version with a hand made mirror polished brass convex Moon section, with black glass below.

Dimensions Bespoke from 15cm to 170cm
Materials Hand silvered black convex glass, Brass
